### DETAILED ACTION

1. This communication is responsive to Amendment filed 11/29/2006.
2. Claims 1-13 are pending in this application. Claims 1, 3-4, and 8 are independent claims.

In Amendment, claims 1-6 and 8-9 are amended. This Office Action is made final.

#### *Claim Rejections - 35 USC § 101*

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims {1, 2, and 8-9}, {3-7}, {10 and 12}, and {11 and 13} are directed to a method, device, program, and computer readable storage medium respectively for transforming a set of data according to an mathematical algorithm as Hadamard transform. In order for claims to be statutory, claims must disclose a physical transformation or a concrete, useful, and tangible result that accomplished a real world application. However, the claims 1-13 merely disclose steps of transforming data comprising steps of rounding and discarding the least significant bit of coefficients. The input into the transformation is a set of number and the output of the transformation is also a set of number. Transformation of data is not "physical transformation" nor are physical acts necessarily a "physical transformation". Clearly, claims merely involve

calculations and manipulations of data in performing computation. Generally, claims 1-13 fail to disclose neither a physical transformation nor a useful, concrete, and tangible result in a form for a practical application. In addition, claims 10 and 12 are merely a software per se claims, lacking storage on a medium which enables any underlying functionality to occur. Therefore, claims 1-13 are directed to non-statutory subject matter.

***Response to Arguments***

5. Applicant's arguments filed 11/29/2006 have been fully considered but they are not persuasive.

a. The applicant argues in page 9 for claims 1-13 that the amended claims are statutory under 35 U.S.C. 101 since they are amended to require a method for executing a computer program steps according to a program stored on a computer-readable medium.

The examiner respectfully submits that the current amended claims are not statutory yet as argued by the applicant because of the following reasons: First, the main reasons are clearly cited in the rejection above wherein the claims mainly cite mathematical transformation or manipulation without providing any practical application or tangible result of the mathematical transformation. Second, the amendment is done in the pre-amble, which might not contribute any weight to the claims. Third regardless it is implemented in general hardware, the claims must specifically disclose the practical application or the concrete, useful, and tangible result of the gist of invention. Fourth, claims 10 and 12 are the software per se which are clearly directed to non-statutory subject matter.

*Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
